

Terminal & AI Coding

Build real things, hands-on

For the terminal-curious — beginners welcome

WHAT WE'LL DO TOGETHER

● THEORY ● DEMO ● WALKTHROUGH ● HANDS-ON LAB

SESSION 1 (TUE) — TERMINAL FOUNDATIONS

THEORY Why the terminal, demystified

Files, folders and navigation — the mental model, minus the fear.

DEMO The commands you actually use

A live tour of the handful of commands that do 90% of the work.

WALKTHROUGH Run AI in the terminal

Together we write and run your first AI-assisted script.

HANDS-ON LAB Read & trust AI code

Run code the AI wrote and learn what is safe vs. worth questioning.

SESSION 2 (THU) — BUILD SOMETHING

THEORY The agentic coding loop

Plan → generate → run → fix — the rhythm of building with AI.

DEMO Building a tool, live

We build a small tool together, e.g. a file organizer.

WALKTHROUGH Debug with AI

What to do when it breaks — debugging calmly with AI help.

HANDS-ON LAB Build, save & re-run

You build your own working tool and save it to use again.

YOU'LL WALK AWAY WITH

A small command-line tool you built, can re-run, and actually find useful.

YOUR INVESTMENT

\$599

per week · 2 live online sessions (Tue + Thu)

Tuesdays & Thursdays

8:00 – 10:00 AM EST · 2 hrs each

YOUR COACH

Vishal Pawar, PhD

Founder & Chief AI Officer, CloudOMax
5× Microsoft MVP · 7× MCT · Forbes
Technology Council · 130K+ trained
